PROFESSIONAL SUMMARY

Software developer building web applications and backend services with Python, PHP, JavaScript, Kotlin, and SQL. Experience with REST APIs, authentication, relational databases, responsive interfaces, and deployment. Has led student development teams through planning, implementation, testing, and release; open to software development opportunities.

TECHNICAL SKILLS

Programming: Python, PHP, JavaScript, Kotlin, HTML, CSS, SQL

Backend and data: Flask, REST APIs, JSON, authentication, MySQL, SQLite, relational schema design, CRUD

Web and mobile: Responsive interfaces, progressive web apps, Android development, API integration

Tools and delivery: Git, GitHub, Postman, Android Studio, Render, Cloudflare Pages, CI/CD

Application security: Input validation, access control, CSRF protection

PROJECT LEADERSHIP

Team Lead - Software Development Projects | 2023-Present

- Led student teams of 3-5 developers across software projects, coordinating delivery from requirements through testing and deployment.
- Coordinated task ownership and resolved backend, database, and mobile development blockers to keep work moving.
- Facilitated code reviews, shared coding standards, and documented technical decisions for project reviews.

SELECTED PROJECTS

- **MeteoMtaa**: JavaScript weather dashboard with hourly and five-day forecasts, activity planning, city comparison, and installable PWA support.
- **Quizora Forge**: PHP quiz and revision platform with timed tests, explanations, score history, targeted practice, and server-side answer checking.
- **SkillWeave Atlas**: Multi-role learning platform with course lessons, unit quizzes, learner progress, instructor tools, and administration workflows.
- **Tradely**: Forex journal for recording trades, reviewing risk and rule notes, attaching before-and-after screenshots, and tracking challenges.
- **Data Analyst Portfolio - Client Project**: Responsive client website built to present a data analyst's skills, selected work, and contact details.

EDUCATION AND CERTIFICATIONS

Bachelor of Science in Software Development | 2023-Present

Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Web Development, System Design, Computer Networks.

Certifications: Cisco Networking Academy - Introduction to Cybersecurity; Getting Started with Cisco Packet Tracer.

IBM SkillsBuild - Data Fundamentals; NVIDIA - Fundamentals of Deep Learning.

Languages: English (fluent), Kiswahili (native)
