Professional Summary

Software developer with experience building web and mobile applications, REST APIs, and database-backed features. Works with Python, PHP, Kotlin, JavaScript, and SQL, and has taken projects from requirements through testing and deployment. Has led student development teams, coordinated technical work, and presented project decisions clearly. Open to software development roles.

Technical Skills

Programming: Python, PHP, Kotlin, JavaScript, HTML5, CSS, SQL

Backend and APIs: Flask, REST API design, JSON, server-side logic, session-based authentication

Databases: MySQL, SQLite, relational schema design, CRUD operations, data validation

Web and mobile: Responsive interfaces, progressive web apps, Android development, API integration

Tools and deployment: Git, GitHub, Postman, Android Studio, GitHub Actions, Render, Cloudflare Pages

Application security: Input validation, access control, CSRF protection

Project Leadership

Team Lead - Software Development Projects | 2023-Present

- Led cross-functional student teams of 3-5 developers across four full-stack projects, coordinating delivery from requirements gathering through implementation, testing, and deployment.
- Organized task ownership and team schedules, tracked progress against deadlines, and helped keep work moving through each development stage.
- Facilitated structured code reviews and shared coding standards to support consistent, maintainable work across the team.
- Resolved technical blockers across backend, database, and mobile workstreams; discussed implementation options and coordinated follow-up tasks with the team.
- Presented project outcomes and technical decisions to academic panels, and prepared documentation to explain the work and support project reviews.

Education

Bachelor of Science in Software Development | 2023-Present

Relevant coursework: Data Structures and Algorithms, Object-Oriented Programming, Database Systems, Web Development, System Design, Software Engineering, and Computer Networks.

Certifications

Cisco Networking Academy: Introduction to Cybersecurity; Getting Started with Cisco Packet Tracer.
IBM SkillsBuild: Data Fundamentals. **NVIDIA:** Fundamentals of Deep Learning.

Languages: English (fluent), Kiswahili (native)

PROJECTS

APPLICATIONS AND CLIENT WORK

MeteoMtaa

Weather dashboard | JavaScript | Progressive web app | meteomtaa.onrender.com

- Built a responsive weather dashboard that helps users check local conditions, plan activities, and compare forecasts across cities.
- Presents current conditions, hourly details, and a five-day forecast using each location's local time.
- Includes an activity planner, forecast-change insights, and comparison for up to three locations.
- Supports Celsius/Fahrenheit, saved locations, up to 48-hour saved forecast fallback, and an installable app shell.

Quizora Forge

Quiz and revision platform | PHP | SQLite | MySQL | quizoraforge.alwaysdata.net

- Developed a learning site for quiz practice, reviewing mistakes, and tracking topics learners want to revisit.
- Implemented registration and session-based sign-in, timed quizzes, question navigation, confidence ratings, and answer explanations.
- Added score history, per-quiz leaderboards, a knowledge map, and a practice queue for missed or low-confidence answers.
- Built a PHP JSON API with server-side answer checking and CSRF protection; included SQLite for local setup and a MySQL schema for hosting.

SkillWeave Atlas

Course and learning platform | Role-based workspaces | skillweave-atlas.pages.dev

- Built a learning platform that supports students, instructors, and administrators through distinct course and account workflows.
- Students can enroll in published courses, study lessons, take unit quizzes, and track progress; passing scores unlock the next unit.
- Instructors manage course sections, lessons, learning materials, and quiz topics, and can review enrollment and completion progress.
- Administrators review courses and manage roles and settings; eligible course completions can generate learner certificates.

Data Analyst Portfolio - Client Project

Client website | Responsive design | Render deployment | kelvin-data-analyst-portfolio.onrender.com

- Built and deployed a portfolio website for a data analyst to present professional information and work to prospective visitors.
- Organized the page around the client's profile, skills, projects, and contact details.
- Created a responsive layout and published the finished site on Render.
